Company announcement: NNIT enters into significant agreement with Danske Bank on delivery of data

center capacity and revises guidance on 2016 investment level

NNIT A/S (“NNIT”), a leading provider of IT services and consultancy announces that today it has entered into a ten-year agreement, with the option of extension, with Danske Bank on delivery of Tier III data center capacity at two different locations, one being NNIT’s existing data center and the other being a data center with one of NNIT’s sub vendors. The agreement will become effective from Q1 2017 and represents a medium-size three-digit DKK million amount.

In consequence of the agreement with Danske Bank, NNIT has decided to expand its data center capacity by building an additional data center. For this purpose NNIT has bought a plot in Ejby. The new data center is expected to be ready for use in Q1 2018.

The building of the data center, including the acquisition of the plot, will lead to an investment of around DKK 250 million over the period 2016-2018. The expected and announced level of re-investments and new client investments in 2016 is thus revised from 5-6% to 7-8%, including the new data center.

The agreement increases NNIT’s backlog for 2017 and 2018, but does not change NNIT’s guidance for 2016 or the long-term targets.
