Once again: NNIT achieves gold certification for data center

Copenhagen, October 1, 2018 – NNIT A/S has achieved the final part of the operational certification for Data Center II situated in Ejby, Denmark. It's the second time within less than a year for the leading provider of IT services and consultancy to achieve full Tier 3 certification for one of its data centers.

This tier III certification, which completes a year-long process, has focused

on documentation for world-class design, facility, and operations for the people working in the data center.

According to the organization behind the certification, the internationally acknowledged UptimeInstitute, around [70% of the registered incidents in data centers](#) are caused by humans.

This recent part of the certification related to operation is therefore extremely important for a quality service provider like NNIT, who delivers the IT backbone to a long list of large corporations and institutions critical to society. Ricco Larsen, Senior Vice President, NNIT A/S explains:

“This certification from UptimeInstitute is an important proof of quality and security because it concerns people and the way we work. At the end of the day, all digital life is carried by a data center, and we can now document that ours match the highest market standards.”

The data center situated close to Copenhagen has previously achieved the rare and prestigious certification for its “design” and “facility”, which is now accompanied by operational certification.

NNIT achieved the full official Tier III certification through UptimeInstitute, an internationally acknowledged and unbiased advisory organization.

Ricco Larsen continues:

“NNIT is now able to offer customers access to three state-of-the-art data centers with Tier III certifications, we are the only IT supplier in Denmark with a complete certification of all our data centers.”

NNIT A/S is one of Denmark's leading IT service providers and consultancies. NNIT A/S offers a wide range of IT services and solutions to its customers, primarily in the life sciences sector in Denmark and internationally and to customers in the public, enterprise and finance sectors in Denmark. NNIT A/S has more than 3,100 employees.
